## PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 3 years of experience crafting dynamic, user-centric web applications. Proven expertise in utilizing cutting-edge technologies, including HTML5, CSS3, JavaScript, and modern frameworks like React to deliver high-performance, visually appealing solutions. Demonstrated success in managing complex projects from conception through deployment, ensuring seamless integration with backend services and superior user experiences. Adept at collaborating with cross-functional teams to translate business requirements into innovative, responsive designs. Committed to staying abreast of industry trends and advancements to enhance skill sets and deliver exceptional digital products continually. Recognized for strong problem-solving abilities, meticulous attention to detail, and a passion for driving technological excellence.

## KEY COMPETENCIES

- Version Control (Git)
- API Integration
- Agile
- Responsive Web Design

- HTML5
- CSS3
- JavaScript (ES6+)
- Typescript

- React.js
- Next.js
- TailwindCSS
- jQuery
- Bootstrap

## PROFESSIONAL EXPERIENCE

### Frontend Developer

Quadra Code | Jan 2021 - Oct 2023

- Engineered scalable and maintainable front-end architectures by leveraging modern frameworks and libraries like React to deliver robust user interfaces.
- Enhanced user engagement and retention by implementing interactive features to evaluate the effectiveness of various design elements and functionality.
- Facilitated seamless communication between frontend and backend teams by defining and documenting API requirements and ensuring proper integration with backend services.
- Monitored and analyzed web application metrics to identify user behavior trends and implemented performance improvements based on data-driven insights.
- Led code reviews and mentored junior developers by providing constructive feedback and sharing best practices to ensure high-quality, maintainable code.

## PROJECTS

- **ERP System Development:** Designed and developed user interfaces using React for an ERP system from inception to completion. Key pages created include Employee Management, Accounts Tree, and Journal Entries. These pages were seamlessly integrated with backend modules to ensure cohesive functionality and optimal performance.

- **E-Commerce Client and Dashboard Interface Development:** Led the design and development of client and dashboard pages for an e-commerce platform using React. Crafted responsive and visually engaging web interfaces from inception to completion, ensuring seamless integration with backend modules and delivering a cohesive user experience focusing on aesthetics and functionality.

- **Comprehensive Website Development :** Spearheaded the design and development of client webpages, executing the entire process from initial concept to final deployment, and Utilized HTML, SCSS, and JavaScript to craft bespoke, responsive web solutions tailored to client specifications.

- **Comprehensive Clinics Management System:** Designed and developed client-facing pages from the ground up utilizing HTML, SCSS, and JavaScript; seamlessly integrated these front-end components with backend modules to ensure a cohesive and efficient clinic management system.
